

DUMMY PENCIL

WORST PENCIL IN THE WORLD

Dummy: stupid; dumb; imitation or copy; a mock-up.
We won't lie, this is exactly what this pencil is; a false object with no apparent use.
The idea behind the production of this pencil is playful: to prank and play with others, a natural and expected behavior in children. We wanted to create a fun object that would allow us to laugh at and with others and ourselves.

It is also a way to mock products and companies struggling ferociously under the premise that only the fittest survive.

The Dummy Pencil is a realistic object, made to look exactly like a real pencil, except that you can't write with it.

CONFORMES TO:
ASTM D4236
EN 71-3
NON TOXIC
